

NORI

THE "SERA" LAMPS ILLUMINATE ABET LAMINATI pRaL® AND STRATIFICATO

Seralighting have selected ABET LAMINATI Stratificato and pRaL® to realize two elegant bracket lamps.

NORI is made by pRaL® and is available in white colour.

pRaL® is obtained by combining a natural mineral with an acrylic polymer, it is mouldable and warm and soft to the touch, but very strong.

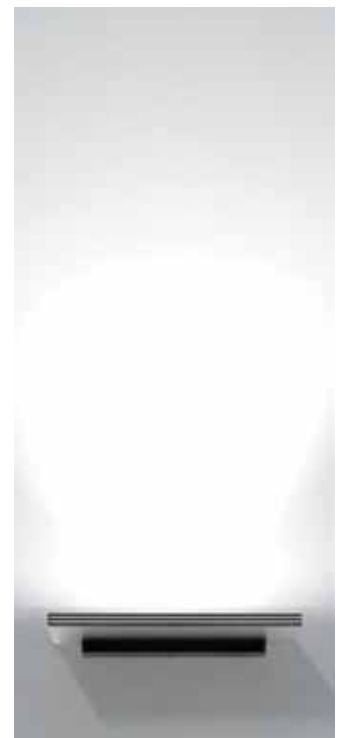

Coloured in its paste, so beyond the surface too, pRaL® is available in different colours and the tones can be customized.

HAB has been produced in different versions using white Stratificato FULL-COLOUR, Stratificato COLOUR-ALL white-aluminium and Stratificato BLACK-ALL black-aluminium.

The Stratificato Print HPL is a self-supporting material which offers excellent functional qualities; it is very resistant and maintains its aesthetic and performance characteristics for the entirety of its life cycle.

ABET LAMINATI Stratificato can be manufactured in more than 500 decors, 30 finishes, 8 sizes and different thicknesses.

Both characterized by the quality that distinguishes every ABET LAMINATI product, pRaL® and Stratificato are the perfect solution to realize refined design objects.
