<b>PRODUCT OVERVIEW</b>	<b>76-121</b>

“As market leader for high quality bathroom accessories, for over 50 years KEUCO has developed and produced quality products which are known for their lasting value, longevity and enduring design. The accessories and fittings of each individual collection are characterized by a consistent design, created by a renowned designer. Years of know-how, ongoing development, and state-of-the-art technologies guarantee the valuable quality, brilliant surfaces and excellent functionality of our brand-name products. The brand, KEUCO, stands for premium products, both in terms of technology as well as design; products which have been recognized and been in demand on the world market for years as ‘German craftsmanship’. KEUCO – our passion for your personal well-being in the bathroom.”

Hartmut Dalheimer, Managing Director/Engelbert Himrich, Managing Partner

PLAN

Handling the fittings is as pleasant to experience as the forms are pure. Whether with chrome, stainless steel or aluminium finish: The excellent design and the unmatched quality of PLAN fittings are remarkable in each individual item. Meticulous design, by the way, reveals itself sometimes very inconspicuously: For example, through ease of cleaning.

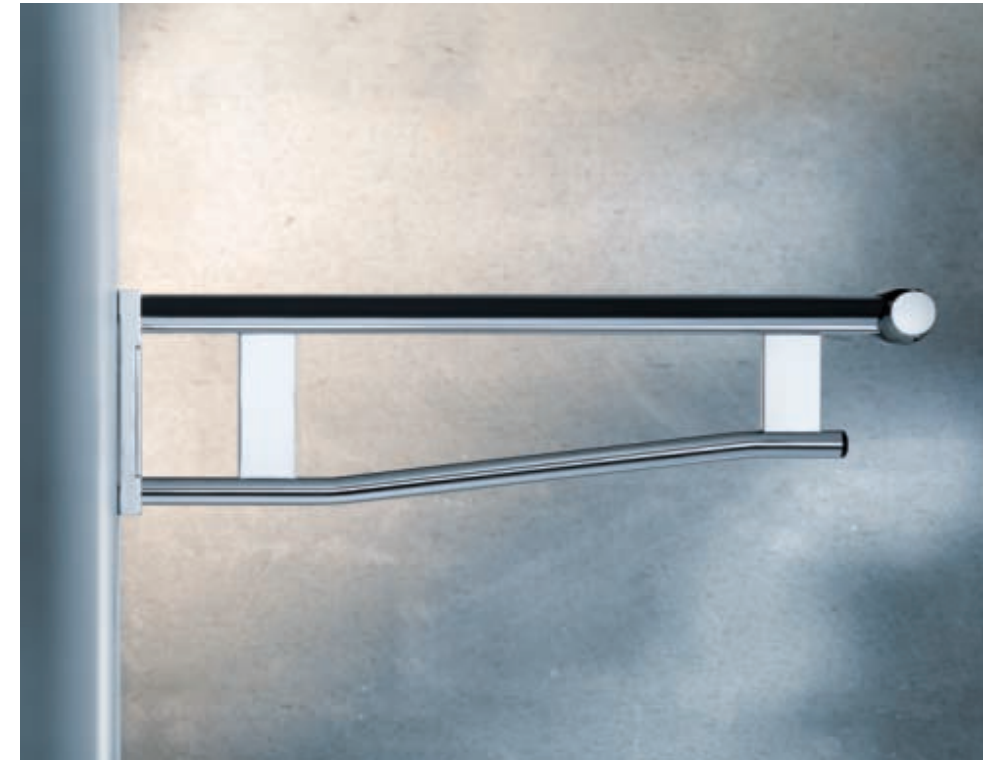

Product overview, see pages 84 – 85

PLAN goes along with all of your plans. After all, it is the most comprehensive bathroom furnishing concept on the market. Together with the surface variations, this variety is multiplied even more: Choose from chrome, aluminium and stainless steel. Below, heavy-quality lotion dispensers; on the right, handles, towel and toilet paper holders.

Product overview, see pages 76 – 83

PLAN products are extremely long lasting. And because expectations of comfort increase with age, a PLAN bathroom can be adapted in this respect over the course of time: on the left a shower setting with folding seat, above right a wall support handle for the WC. Underneath, with uncomplicated elegance, a towel hook and tumbler holder with crystal glass tumbler.

**Product overview, see pages 76 – 83**

ELEGANCE

Right angles and straight lines coupled with sweeping curves. ELEGANCE convinces with its expressive, classic-modern design. On the left, towel rail and sponge wire basket with hygienic, removable plastic insert; on the right the single-lever basin mixer – it includes intelligent ergonomics and is very cleaning-friendly.

Product overview, see pages 86 – 91

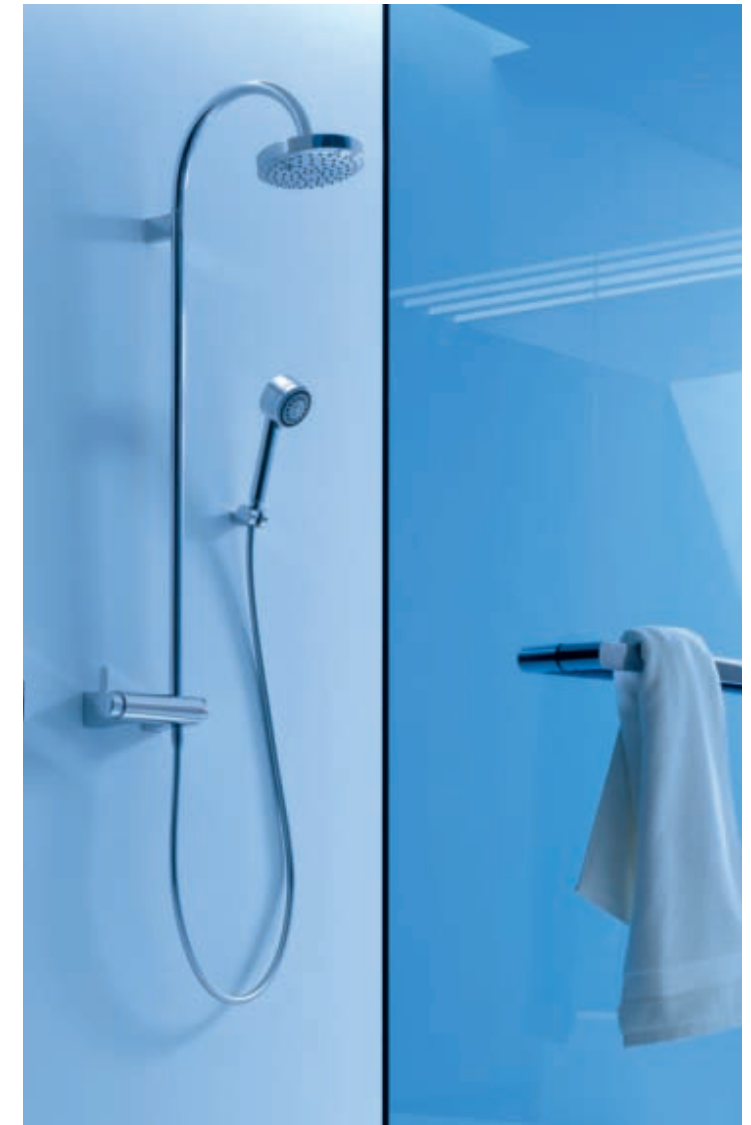

ELEGANCE

Possible solutions à la carte: Even the shower units can be flexibly adapted to your wishes. Because, the great variety allows unrestricted design options. And that is always a part of ELEGANCE.

Product overview, see pages 89 – 91

ELEGANCE

The comprehensive ELEGANCE assortment ranges right to the chrome-plated bidet fitting. To the right the closed paper holder, below a WC set with chrome-plated lid and convenient operation.

Product overview, see pages 86 – 87

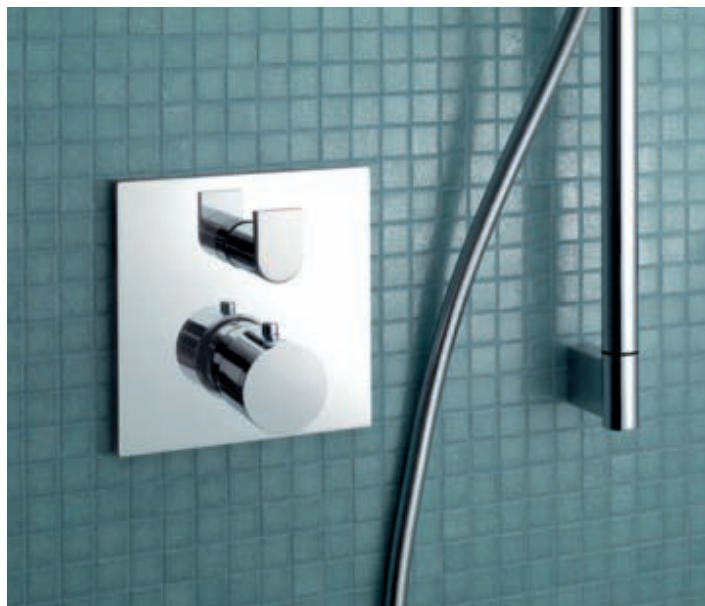

EDITION 300

The rich variety of EDITION 300 fittings allows generous planning freedom. Shower mixers are available, for example, as on wall or in wall mounting model, as single lever mixer or thermostat mixer. Below are the free standing washbasin fittings. Concealed from sight, but all the more useful: the inner ceramic cartridge with temperature limiter.

**Product overview, see pages 93 – 95**

EDITION 300 design is expressed in the accessories in its own unique way. With beautiful symmetry, circular edges and straight lines combine into simple, highly functional forms.

Product overview, see page 92

EDITION Palais

EDITION Palais borders the exciting area where classic elegance and modern minimalism meet. This is demonstrated plainly also by the fittings and accessories. Typical KEUCO: The fittings are available in many variations for all possible wash-basins, shower and bath settings. A choice is also available for the surfaces: either chrome or palladium silver, which was developed by our own electroplating department and has a slightly gold-like metal shine.

**Product overview, see pages 96 – 97**

Light reflections trace out the characteristic profile of EDITION Palais. Clockwise: Towel holder and ring, wall holder with white porcelain tumbler, soap holder with white porcelain dish.

**Product overview, see pages 96 – 97**

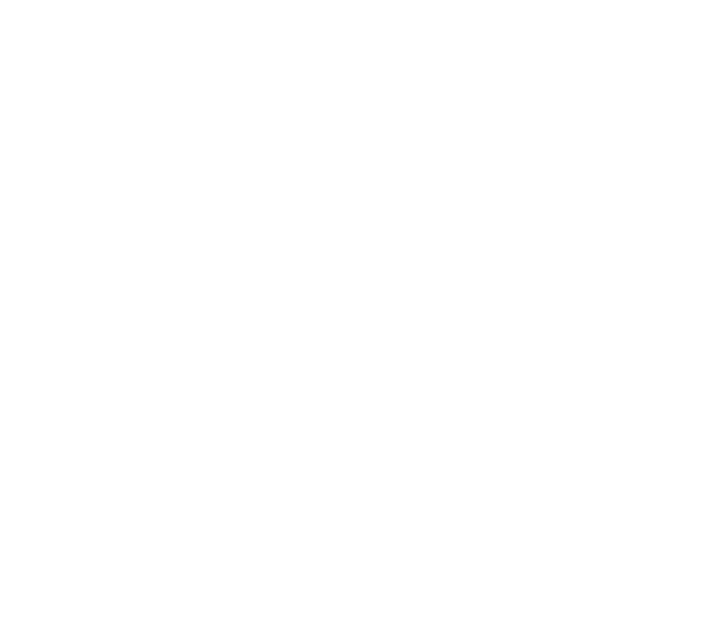

EDITION Atelier

Straight lines, right angles and circles: Out of simple basic forms, EDITION Atelier creates its own aesthetic quality. Its functional clarity characterises also the fittings and accessories. The accented tubular form of the fittings creates a special effect. Left a shower unit and towel holder, on the right the free standing bath tub mixer.

**Product overview, see page 99**

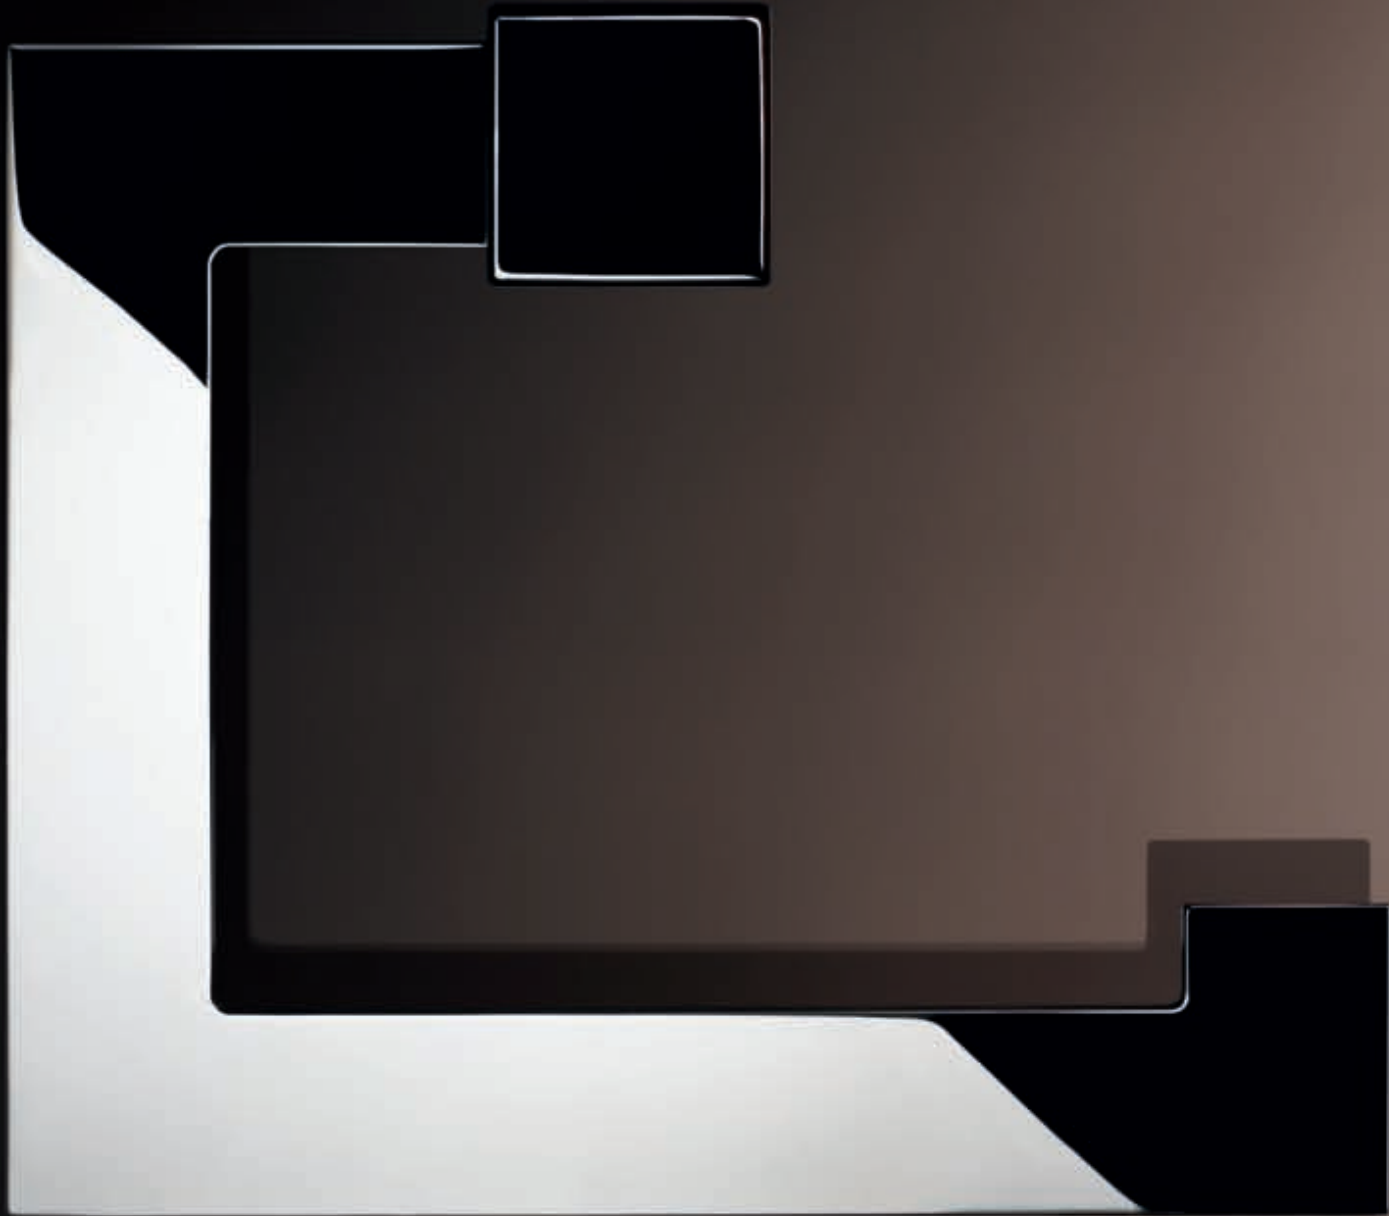

EDITION Atelier blurs the boundaries between separate living spaces. Even the accessories of the edition facilitate a flowing transition to the bedroom: chrome-plated floor lamp with chintz shade and side table with porcelain top (at the very left and the right very respectively). In the middle: heavy, four-part stacking accessories to store small utensils. Toilet paper double holder, toilet brush set and foam-soap dispenser.

**Product overview, see page 98**

Accessories

The striking foundation of ALEA is the metal cube of the wall mounting. Coupled with flowing forms and flat metal bands, the design generates a light, modern feeling. Below the soap holder, on the right a towel hook, towel ring and the tumbler holder with frosted crystal glass tumbler.

Product overview, see pages 100–101

AMARO is a comprehensive accessories series whose character emanates from the playful use of round forms. On the right the lotion dispenser in the spiral shaped holder. On this page: soap holder with crystal glass dish, towel ring and universal shelf with rail and crystalline glass plate.

Product overview, see pages 102 – 103

Elegance out of circular and ball forms: With its collar covers, ASTOR accessories shine in the bathroom with an aristocratic flair. Left the chrome-plated towel ring. Right: lotion dispenser made of frosted opal glass, soap holder with crystal glass dish, tumbler holder with crystal glass tumbler and toilet paper holder with cover.

**Product overview, see pages 104 – 105**

Urban style with an unbeatable price-performance ratio: CITY.2 brings an objective elegance into the bathroom. The series satisfies a wide range of needs, thanks to the large variety of products. On the right the lotion dispenser, on this page the soap holder and towel ring.

**Product overview, see pages 106 – 107**

The internationally renowned Italian architect and designer Matteo Thun created the KEUCO series CLEO. He was inspired by the movement of water whose vibrant dynamism he carried over into the accessories – clearly seen in the towel ring on the left. On the right a toilet brush set, above that the soap holder fashioned from one piece out of metal, and the lotion dispenser made of frosted opal glass.

**Product overview, see pages 108 – 109**

The perfectly crafted accessories of EDITION 200 are not only attractive to look at, they also satisfy the most stringent demands on ergonomics and longevity. On the left shimmers the lotion dispenser made of frosted opal glass. Above: soap dish and towel ring, both chrome-plated.

**Product overview, see pages 110 – 111**

Despite its name, the SOLO collection is a mature series with a wide range of products. At the most, the only feature it has where it stands alone is its attractive price-performance ratio. Quartet including soap holder, toilet paper holder, double tumbler holder and towel ring.

**Product overview, see pages 112 – 113**

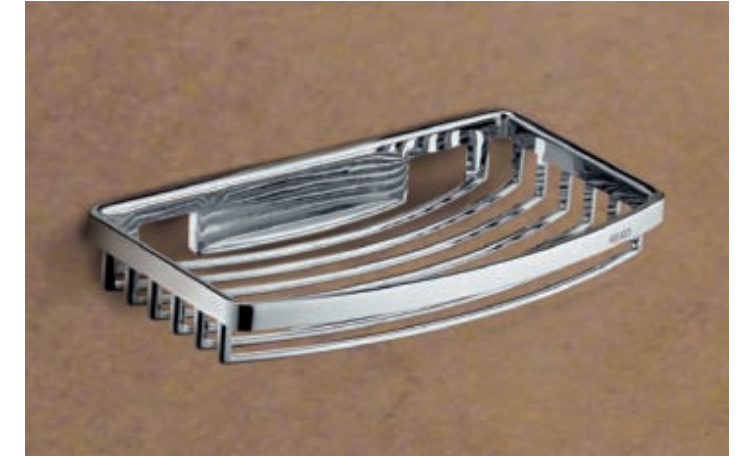

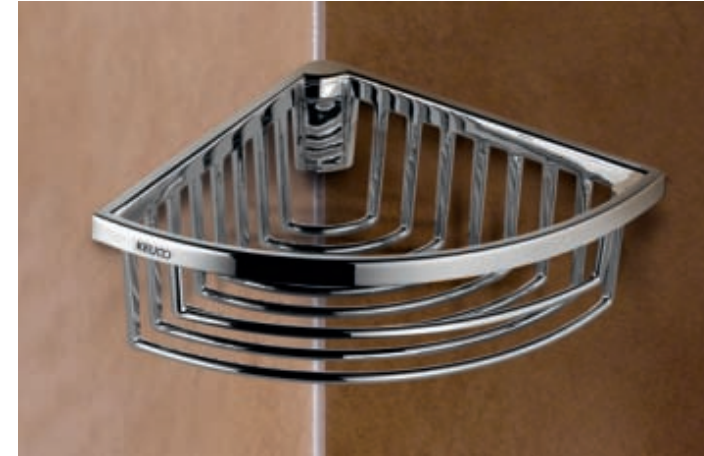

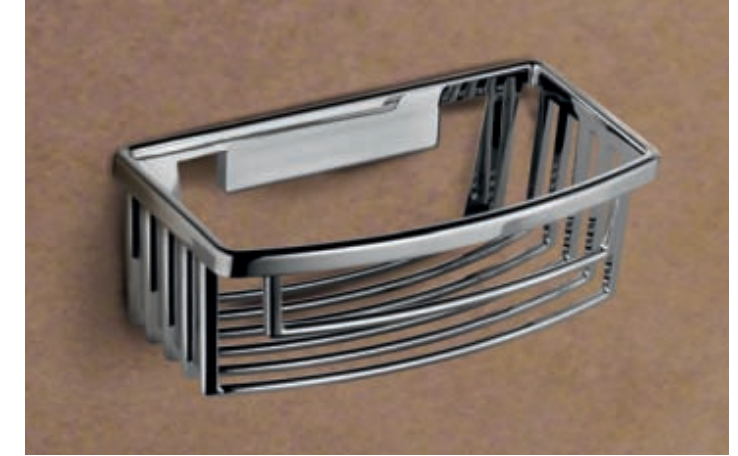

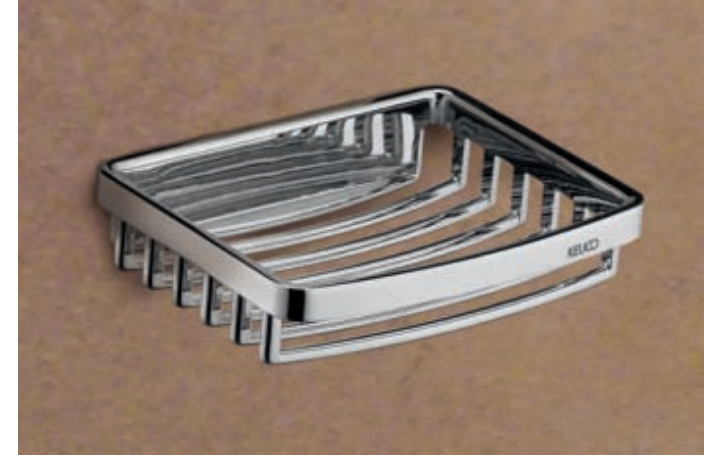

A universe of accessories: The universal articles satisfy every need, because they offer a suitable accessory for any situation. They are just as suitable for private use as for use in public facilities. Thanks to their functionally practical design and the different variations, they complement every kind of bathroom furnishing.

**Product overview, see pages 114 – 116**

Properly designed shower accessories: Whether mounted in the corner or on the wall, whether with high rail or low, whether wide or thin – everything that foams has a suitable place thanks to the rich assortment of KEUCO soap baskets.

**Product overview, see pages 116 – 117**

The BELLA VISTA also illuminates without glare, but doesn't fit in the handbag because of its generous size. It makes up for that with its flexibility: It features a flexarm and is available in variations with direct mains connection, mains adapter or as standing model.

**Product overview, see pages 118 – 119**

The iLook has the potential to become your permanent companion because it isn't just practical in the bathroom but also in every handbag. Its battery operated, glare free LED light conducting technology and the distortion free optics meet even professional requirements. The iLook offers many set-up variations and if desired it is also available with wall mounting rod and additional mains adapter.

**Product overview, see pages 118 – 119**

You will surely take a second look: cosmetic mirrors in all variations. Illuminated or not, standing models, wall mounted models, various sizes and with various adjustment possibilities. In the end, not only your bathroom should look good, but you as well.

**Product overview, see pages 118 – 119**

GUEST BATHROOMS

With ELEGANCE, we have thought of everything – even your guests: For the smaller cloakroom there is a light mirror and wash-basin in size S. Right: The foamed soap dispenser supplies a fine mousse – this has a luxurious feel and is also economical with wash lotion. Bottom right: Just as with the larger models, the small sink base unit also offers much room for storage behind its hinged door.

**Product overview, see pages 86 – 91**

The guest bathroom is a special calling card in every house. EDITION 300, with its high degree of functionality and stylistic elegance, is especially apt at leaving an excellent impression on your guests. With the compact, minimally projecting washbasin dimensions, it is possible to design even guest bathrooms generously with charm. The towel holder and vanity unit with its front drawer and integrated towel opening offer much comfort for small rooms.

Product overview, see pages 92 – 95

Overall, PLAN is the most comprehensive and changeable KEUCO collection. This can be appreciated in the guest WC. The number of variations with PLAN allows the most elegant of solutions for even the smallest of rooms. On top of that, new standards have been set for matters of functionality with the single lever mixer, the pillar tap and the sensor mixer.

**Product overview, see pages 76 – 85**

Asymmetrical forms and the unmistakable multi-purpose rails: The JOLY design concept demonstrates its adaptability during the planning phase. It can make a small guest WC into a virtual adornment.

**Product overview, see page 120**

Innovationspreis  
Architektur und Bauwesen

Behind the discrete elegance of glass and aluminium, VISIT presents surprisingly detailed solutions. The lotion dispenser is elegantly integrated in the panel of the light mirror. Spare WC paper and toilet brush find an unobtrusive spot in the wall box.
